

# The NFPP wants to help you to make the holidays greener with an upcycled gift bow!

To Make your upcycled gift bow:

1. Cut out the attached template pieces.

2. From a clean empty food wrapper, and using the template pieces as a guide, cut four of the longest pieces, two of the middle size pieces, and one of the smallest pieces.

3. Punch holes in the bow pieces as shown on the templates.

4. Create a loop with the smallest bow piece and place the paper fastener through the punched holes.

5. Using a middle sized piece, twist the ends making a loop on both ends and line up all of the punched holes in the center.

6. Add the newly looped bow piece to the original loop/fastener by placing the fastener through the holes of the second piece.

7. Repeat steps 5 and 6 for all remaining pieces going from shortest to longest pieces.

8. Secure the bow by opening the pointy ends of the paper fastener.
