

## Biology Drawing Rules

1. Use only unlined paper.
2. Only pencil--no pen, crayons, or markers.
3. Perfect circles are to be to represent your field of view. Use a compass or smooth round surface.
4. Field of view circle should be large and side centered to the left. ( located to the left halfway down the page)
5. There must be a printed title. It is to be level and centered at the top of the page.
6. Your name is to be printed in the top right corner of the page. Below that put the date.
7. Total magnification is to be printed below the field of view circle.
8. All labels must be printed to the right of the field of view, level, and spelled correctly.
9. No labels are used more than once.
10. All lines must be level and drawn with rulers.
11. Never use an arrowhead on the ends of you label lines.
12. Do not draw in air bubbles or the pointer.
13. Center all drawings within your field of view.
14. Make your drawing in proportion to the size of your field of view and your microscope's field of view.
